

CASTIC

CASTIC (China Adolescent Science and Technology Innovation Contest) is a mega event organised annually by the Children and Youth Science Centre (CYSC) of the China Association of Science and Technology (CAST). It is a national level contest in science and technology for adolescent children held in different cities of the country. Winners from different provinces are invited to take part in this event with their projects. Every year CAST office in Beijing invites entries from other countries too. Countries from Asian, European, American and African continents usually participate in the event.

Indian participation in CASTIC began in 2007 with the project displayed in 22nd CASTIC held in Kunming. Since then students from VPM's A. K. Joshi English Medium School, Thane have been taking part in CASTIC competitions regularly without any break. It celebrated its decade of participation with 31st CASTIC held in Shanghai in 2016. The projects displayed by Thane students were received very well both by academic community and common citizens. Their excellence was recognised in the form of awards given to them number of times among international participations. [More.....](#)
